**Week Ending**  
**1/29/21**  
**Bill Zerfas, Editor**

## HED Welcomes Jessie Wozniak to the RAB I Tox Team!

### Ex. 6 Personal Privacy (PP)

Jessie (Jess) Wozniak has a diverse academic background. She received her bachelor's degree from Appalachian State University studying Spanish language and focusing on laboratory research on *Vibrio cholerae* pathogenesis. Following this, she worked at Wake Forest University researching the viral and bacterial pathogens causing otitis media in children. She then completed her PhD in microbiology and molecular genetics from Emory University where she was awarded the Laney Graduate School Fellowship. Her doctoral work focused on antimicrobials and antimicrobial resistance in highly drug resistant human pathogens. She has a passion for public health and science communication, has authored and co-authored several manuscripts and has presented her research at local and national research conferences.
